Tuesday, October 1, 2019 at 10am and 12:30pm & Wednesday, October 2, 2019 at 10am and 12:30pm

Doktor Kaboom is having trouble picking his favorite science demonstrations, so he’s bringing them all! Unfortunately, there are way too many to do them all in one show. The solution: The Wheel of Science! Doktor Kaboom has built a great big spinning wheel and labeled it with everything from optical illusions to chemical reactions to a homemade hovercraft, and more! At least a dozen fantastic demonstrations are ready to go, and wherever the wheel stops, that’s what’s next! So, step right up, and let’s spin that wheel! Creatively blending theater arts with the wonders of scientific exploration, Doktor Kaboom’s supercharged (and super safe!) science experiments will have you erupting with laughter and bubbling with curiosity.

Social By Nature with Photographer Ronan Donovan
Friday, October 18, 2019 at 10am

What’s a human? We are, at our core, social mammals. We build relationships, communicate, reproduce, establish territories, and adapt to shrinking resources. In these ways, we’re no different than other social mammals. Chimpanzees, wolves, and gorillas are among the most charismatic of the mammals we know. We identify with them as species, groups, and even as named individuals. They’re also under threat. Join biologist-turned-photographer Ronan Donovan as he talks about his work in documenting these animals and what we, as fellow social mammals, can learn from them.

Tickets: $10/Student
