Chris Scherpenseel

“Cosmic Campground”

$599

**Image Description:** Galactic Center of the Milky Way Galaxy with Jupiter and Saturn

**Location of Image:** Madison River in Yellowstone National Park

**Type of Camera and Lens Used:** Canon 6D Mark ii and Canon 24mm prime lens

**Camera Settings Used:** ISO 6400 - 20 second exposure - f2.8

**Artist Statement:** Cosmic Campground was taken along the Madison River in West Yellowstone. The image was shot in early July 2019 with the intent of capturing the galactic center of the Milky Way Galaxy. The bright object to the right of center is Jupiter. The smaller bright object to the left of the galactic center is Saturn. The steam rising along the bank of the river are known as fumaroles. They are a result of the volcanic activity generated underneath Yellowstone National Park.
